Subject: RE: Incident Reporting/HBHC Crop Pest Management Call

Greetings,

Following through on our discussion from earlier this week, I have incorporated the additional challenges identified by George Hansen into the Incident Reporting document (attached). A section on overcoming challenges has been added as well. The attached document is intended to serve as a means of stimulating discussion and is not intended as a comprehensive assessment of the issues/solutions. Please feel free to make edits/suggestions/comments so that the document achieves a reasonable balance of perspectives. Also, please keep in mind that the attached document should not be construed as necessarily representing the position/perspective of the U.S. Environmental Protection Agency or the U.S. Government.

Tom

Subject: Incident Reporting/HBHC Crop Pest Management Call

Hello All,

Looking forward to our incident reporting subgroup call tomorrow at 2 eastern ((877) 662 – 7634; 8518 104#). We'll check in on the paper that Tom sent around, along with the attached overview of barriers that George shared with me and asked me to send to all of you. As discussed on our last call, the aim of the subgroup is to characterize the current processes for incident reporting, the barriers, and the potential opportunities that the Coalition can pursue in overcoming those barriers.

Our full crop pest management working group call will be this Friday so the hope would be to pull the current work documents together and further advance them so that we can use the working group call for more discussion of where to go from here.

Thanks,

Julie

Subject: RE: Action items from today's Incident Reporting/HBHC Crop Pest Management Call

Attached is a document that attempts to frame out incident reporting. It's more than an outline; however, it can always be parsed down to key points. I have not fleshed out what role the Coalition may play; however, once George provides input on impediments to incident reporting, we may have a sufficient foundation on which to build solutions. Please let me know if you have any comments/concerns regarding the document.

Subject: Action items from today's Incident Reporting/HBHC Crop Pest Management Call

Hi All,

Thanks for your time today. Here's the recap of actions:

- 1) Tom will draft an initial outline addressing questions re: incident reporting (and hive reporting where appropriate) and circulate to the subgroup for further additions
 - a. What are the current procedures that are in place?
 - b. What are the barriers to reporting?
 - c. What solutions might the Coalition implement/recommend/endorse (what is the solution, what is the proper channel to communicate and/or implement it)?
- 2) George will work on barriers
- 3) Caydee will explore what is different/what is working in Canada
- 4) Call on July 14 at 2 eastern to review the draft, further discussion potential solutions – in advance of the full working group discussion

Thanks again!

Julie
